**What is it?** (Provide definition)

An excessive level of cholesterol in the blood which could cause arteries to become blocked.

**Signs and Symptoms**

No observed signs or symptoms

**Promotion/strategy support required**

- Give medication as ordered (see Medication Administration Record/Log).
- Include any specific instructions from the treating physician. For example, weight loss plan, exercise plan, smoking cessation, etc.
- Ensure that (name of person) receives diet recommended by physician (list diet here).
- Obtain lab work as ordered by physician.
- Documentation about this condition can be found in the medical record under (list section here).
- Receive training regarding this diagnosis and plan of care (include when to notify the physician) by (title of person who provides medical training) at least (indicate frequency of training) or as changes occur. This should be documented for all staff in the home.

**Frequency of support**

Fill in what physician (e.g. primary care physician, cardiologist) treats this condition and how often the person is seen.

**Desired outcome**

To maintain cholesterol levels within normal limits

**Person/agency responsible**

(Name of person), caregivers, agency nurse, primary care physician, (specialist, if applicable)

(The responsible parties may vary according to your agency; please place specific roles in this section. Some other examples might be health care coordinator, program specialist, house manager.)
