

Health Promotion Activities Plan

**\*\*This sample is to assist you in developing a health promotion activity plan. It is not intended to replace medical advice. Any instructions given by the physician regarding this diagnosis must be included.**

Name of Individual:

Health Concern/Issue * (Diagnosis)	<b>MITRAL VALVE CALCIFICATION WITH PROLAPSE AND REGURGITATION</b>
Related Body System	Vision      Respiratory      Lymphatic      Dental      Hearing      Digestive      Integumentary (Skin)      Endocrine <b>Cardiovascular</b> Nervous      Musculoskeletal      Genitourinary      Blood
What is it? (Provide definition)	An accumulation of calcium salts in the mitral valve of the heart, causing a failure of the valve to close properly and a backflow of blood into the left upper chamber of the heart
Signs and Symptoms (general)	Usually there are no symptoms. If symptoms exist, there may be fatigue, shortness of breath, heart palpitations (person feels their heart pounding), dizziness, light headedness, chest tightness and fainting
Signs and Symptoms (specific to the person):	
Promotion/strategy support required * List very specific steps that the individual and/or caregivers use to support the person's health condition.  Include information about monitoring health status. Who is called for changes/ problems in this person's health condition?  What is tracked, where it can be found, and who follows up on documentation required for this health condition?  Who provides what training for the person and staff about the health condition and when?	<ul style="list-style-type: none"> <li>➤ Watch <u>(name of person)</u> for signs and symptoms listed above and report immediately to <u>(title of person in agency who is responsible to receive this information)</u>.</li> <li>➤ Give medication as ordered (see Medication Administration Record/Log). If a prn (as needed) medication is given, the result must be documented per agency policy.</li> <li>➤ <u>Include any specific instructions from the treating physician.</u> For example, weight loss plan, exercise plan, avoid caffeine, using non-pharmacologic measures to control blood pressure, if blood pressure should be monitored in the home, for what blood pressure readings to notify the physician, etc.</li> <li>➤ Ensure that <u>(name of person)</u> receives diet recommended by physician <u>(list diet here)</u>.</li> <li>➤ Documentation about this condition can be found in the medical record under <u>(list section here)</u>.</li> <li>➤ Receive training regarding this diagnosis and plan of care (include when to notify the physician) by <u>(title of person who provides medical training)</u> at least <u>(indicate frequency of training)</u> or as changes occur. This should be documented for all staff in the home.</li> </ul>
Frequency of support *	<i>Fill in what physician (e.g. primary care physician, cardiologist) treats this condition and how often the person is seen.</i>
Desired outcome *	To recognize symptoms as soon as possible to obtain treatment
Person/agency responsible *	<u>(Name of person)</u> , caregivers, agency nurse, primary care physician, <u>(specialist, if applicable)</u> <i>(The responsible parties may vary according to your agency; please place specific roles in this section. Some other examples might be health care coordinator, program specialist, house manager.)</i>
