

**\*\*This sample is to assist you in developing a health promotion activity plan. The information in it is for training purposes. It is not intended to replace medical advice. Any instructions given by the physician regarding this diagnosis must be included.**

Name of Individual:

Health Concern/Issue * (Diagnosis)	<b>WILLIAMS SYNDROME</b>
Related Body System	Vision      Respiratory      Lymphatic      Dental      Hearing      Digestive      Integumentary (Skin)      Endocrine      Cardiovascular Nervous      Musculoskeletal      Genitourinary      Blood <b>Genetic</b>
What is it? (Provide definition)	Williams syndrome is a genetic disorder characterized by mild mental retardation, distinctive facial appearance, problems with calcium balance, and blood vessel disease.
Signs and Symptoms (general)	Mild to moderate mental retardation; short stature relative to family; low muscle tone and poor gag reflex; joint laxity which may progress to stiffness as person gets older; distractibility; learning disorders (for example visual-spatial abilities); blood vessel narrowing (including supraaortic stenosis, pulmonic stenosis and pulmonary artery stenosis); sunken chest, overly friendly-trusting strangers, fear of loud sounds or physical contact, and affinity for music.
Signs and Symptoms (specific to the person)	
Promotion/strategy support required * List very specific steps that the individual and/or caregivers use to support the person's health condition.  Include information about monitoring health status. Who is called for changes/ problems in this person's health condition?  What is tracked, where it can be found, and who follows up on documentation required for this health condition?  Who provides what training for the person and staff about the health condition and when?	<ul style="list-style-type: none"> <li>➤ Watch <u>(name of person)</u> for signs and symptoms listed above and report immediately to <u>(title of person in agency who is responsible to receive this information)</u>.</li> <li>➤ Give medication as ordered (see Medication Administration Record/Log). If a prn (as needed) medication is given, the result must be documented per agency policy.</li> <li>➤ <u>Include any specific instructions from the treating physician.</u></li> <li>➤ Ensure that <u>(name of person)</u> receives diet recommended by physician <u>(list diet here)</u>.</li> <li>➤ Documentation about this condition can be found in the medical record under <u>(list section here)</u>.</li> <li>➤ Receive training regarding this diagnosis and plan of care (include when to notify the physician) by <u>(title of person who provides medical training)</u> at least <u>(indicate frequency of training)</u> or as changes occur. This should be documented for all staff in the home.</li> </ul>
Frequency of support *	<i>Fill in what physician (e.g. primary care physician, cardiologist) treats this condition and how often the person is seen.</i>
Desired outcome *	To maintain health and recognize symptoms as soon as possible in order to obtain treatment.
Person/agency responsible *	<u>(Name of person)</u> , caregivers, agency nurse, primary care physician, <u>(specialist, if applicable)</u> <i>(The responsible parties may vary according to your agency; please place specific roles in this section. Some other examples might be health care coordinator, program specialist, house manager.)</i>
